Average Energy Prices, Miami-Fort Lauderdale-West Palm Beach – November 2018

Gasoline prices averaged \$2.673 a gallon in the Miami-Fort Lauderdale-West Palm Beach area in November 2018, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Janet S. Rankin noted that area gasoline prices were 11.9 cents higher when compared to last November when they averaged \$2.554 per gallon. Miami area households paid an average of 11.8 cents per kilowatt hour (kWh) of electricity in November 2018, similar to the 11.9 cents per kWh paid in November 2017. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect the impact of seasonal influences.)

Miami area consumers paid \$2.673 a gallon for gasoline in November 2018, similar to the \$2.733 paid nationally. A year earlier, prices paid for a gallon of gasoline by consumers in the Miami area compared to the national average. The average price for a gallon of gasoline in Miami in the month of November has been similar to the nationwide average in each of the last 5 years. (See [chart 1](#).)

Chart 1. Average prices for gasoline, Miami-Fort Lauderdale-West Palm Beach and the United States, 2014–2018 (as of November)

Per gallon

The **Miami-Fort Lauderdale-West Palm Beach, Fla., Metropolitan Statistical Area** consists of Broward, Miami-Dade, and Palm Beach Counties in Florida.

The Consumer Price Index for December 2018 is scheduled to be released on Friday, January 11, 2019.

Technical Note

Average prices are estimated from Consumer Price Index (CPI) data for selected commodity series to support the research and analytic needs of CPI data users. Average prices for electricity, utility (piped) gas, and gasoline are published monthly for the U.S. city average, the 4 regions, 9 divisions, 2 population size classes, 8 region/size-class cross-classifications, and the 23 largest local index areas. For electricity, average prices per kilowatt-hour (kWh) are published. For utility (piped) gas, average prices per therm are published. For gasoline, the average price per gallon is published. Average prices for commonly available grades of gasoline are published as well as the average price across all grades.

All eligible prices are converted to a price per normalized quantity. These prices are then used to estimate a price for a defined fixed quantity. The average price per kilowatt-hour represents the total bill divided by the kilowatt-hour usage. The total bill is the sum of all items applicable to all consumers appearing on an electricity bill including, but not limited to, variable rates per kWh, fixed costs, taxes, surcharges, and credits. This calculation also applies to the average price per therm for utility (piped) gas.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
